

Here is what one official stated about amateur radio resources. I would not want any changes in regulations to permit any type of radiation which will raise noise levels thus making communications in an emergency and more difficult than they presently are.

<snip>

Chief Operating Officer of the Emergency Preparedness and Response Directorate (FEMA) Ron Castleman represented DHS at the signing. Citizen Corps Liaison to the White House Liz DiGregorio called ham radio operators the ''first of the first responders.''

<snip>

Please protect our valuable spectrum from intruders regardless of whom they are.

Based on test reports I've seen, PBL/PLC permitted issues will and do raise RF noise levels beyond means which will permit communications under present technological conditions.

Thanks

Bob McGraw, K4TAX
